

## Information on Booking Partnership Continuum Services for Corporate Employee and Leadership Development Training Programs

### Customizable Corporate Training Programs

For the most part, our [training programs](#) flow along the lines of our award-winning [methodology](#) and [approach](#), but our team of partnering experts can customize any program to match your organization's specific needs. (see [Client Accolades](#))

Workshops and seminars on your site can be designed around your team, your departmental group, or even joint sessions with your group and your organization's external partner's group.

We customize our programs to work with current, real challenges and opportunities within your organization and provide your key individuals, leaders and teams with actionable ideas, capabilities, and tools to create immediate and measurable results.

### Assessment Application Sessions

In addition to our formal training programs listed above, if you would like your team, department, or other internal group to take our online assessments in a group setting, we also offer optional customized two- or four-hour "application sessions" for the group. These follow-up sessions teach your group to further apply what they learned from their individual assessments.

### Price

The price for our training programs and our assessment-application sessions varies according to the following factors:

- Number of your participants
- Duration (hours, days) of the training
- Location (we provide worldwide services)
- Degree of customization

### Next Steps

It would be a privilege to discuss your organizational requirements for our training programs and provide an outline proposal of our approach. To discuss your needs or to book a training/development session or consulting services, please e-mail Stephen Dent at [sdent@partneringintelligence.com](mailto:sdent@partneringintelligence.com) or contact him at one of the following numbers:
